Blayson Today

Founded in 1961, Blayson is today the leading specialist manufacturer of superior quality investment casting wax, and supplier of ancillary materials and services to the global investment casting industry. This is achieved through a network of agents and distributors covering the World.

As such Blayson is a key supplier to industries of strategic importance for example :
Aerospace; Medical Prostheses; Automotive; Defence; Communication; Power Generation; Microwaves; Electronics; Marine; Sport & Leisure; Construction; etc

Blayson is a stable independent company and is recognised globally as a leader in wax technology.

As a pioneer of the Reclaim and Reconstitution process for recycling wax, Blayson has been instrumental in reducing foundry costs and encouraging environmentally friendly operations.

Blayson has a proven history of innovation through being an active member of the major investment casting technical organisations around the World, and through collaboration with leading universities.

Blayson Product Range

Blayson manufactures a comprehensive range of products comprising

- Pattern wax**
- Runner wax**
- Soluble wax**
- Wax Reclamation and Recycling**
- Adhesive and Repair wax etc**
- Injected Runner bars**
- Pattern Wash and Mould Release agents**

Quality Control and Research & Development

Blayson has a dedicated team of technical staff based in both the UK and Japan. Both Technical Centres are equipped with industry standard wax testing and injection equipment. This allows not only complete control of manufactured products, but facilitates extensive Research & Development.

Blayson is accredited to ISO 9001:2000 :

Blayson delivers value through

- High quality cost effective products
- A partnership approach to support and develop customers' business
- Providing pro-active technical support
- Reducing process costs through innovation
- An on-going programme of R&D to develop new and enhanced products and services to improve efficiency and reduce costs

Blayson is committed to pursuing excellence and to providing a better understanding of wax, ancillary materials and equipment, to enable customers to maintain and improve their competitiveness.
